

## Cone Drive Slewing Bearings

Cone Drive's slewing bearings are designed to react all axial and radial forces, and also resulting tilting moments in a single self-retaining and ready-to-install bearing unit to use in your most challenging applications.

Our slewing bearings low profile designs are optimized for weight versus performance, have a large, open inner race diameter enabling system design flexibility, and can also be integrated into a slewing drive using Cone Drive's significant gearing expertise. All these technical benefits combined with Cone Drive's industry-leading quality standards

### CD-RK FLANGED Slew Bearings

- **LOW PROFILE DESIGN**
- **OPTIMIZED FOR WEIGHT AND PERFORMANCE**
- **STOCK AVAILABLE**

• **Available With:**

No Teeth  
Internal Teeth  
External Teeth

• **Moment Loads Up To:** 56,500 Ft-Lbs

• **Internal Diameters:** 16.2 - 33.15 Inches

• **External Diameters:** 20.4-37.3 Inches

### CD-MT Slew Bearings

- **INDUSTRIAL GRADE**
- **OPTIMIZED FOR PERFORMANCE**
- **LARGE SIZE RANGE**
- **STOCK AVAILABLE**

• **Available With:**

No Teeth  
External Teeth

• **Moment Loads Up To:** 443,000 Ft-Lbs

• **Internal Diameters:** 4.8 - 27.7 Inches

• **External Diameters:** 9-38.2 Inches
